CARBON, ALBERTA, THURSDAY, AUGUST 28, 1930

\$2.00 A YEAR IN ADVANCE

WHEAT POOL ANNOUNCE INITIAL PAYMENT OF 60c

WINNIPEG, August 28.—Initial payment by the Canadian Wheat Pools on wheat of the 1930-31 crop delivered today and hereafter, until further notice, will be 60 cents per bushel. The advance, announced last night following a long wait for the official statement is made on the basis of No. 1 Northern at Fort William.

The initial payment now stipulated is a 10-cent drop per bushel from the interim initial payment set on July 15, cut off date from the 1929-30 crop. Initial payment on rye is placed at five cents per bushel more than the July 15 figure, but other grains are to be granted initial payments equal exactly to the figure named in mid-July. The other initial payments as stated last night for deliveries henceforth, are, per bushel:

Barley, No. 3 C.W., 25 cents; Oats, No. 2 C.W., 30 cents; rye No. 2 C.W., 35 cents; and flax, No. 1 N.W., \$1.25.

The figure for wheat is 25 cents per bushel below the lowest mark hitherto noted in Wheat Pool records and 40 cents below the initial payment in every year but one. Since the formation of the Wheat Pool in the West seven years ago, initial payments on wheat have always been \$1, with the exception of 1928, when the heavy crop sent prices down far enough to necessitate placing the initial payment at 85 cents.

SENSATIONS OF FLYING

No doubt passengers taking their first flight in an aeroplane, do so with various ideas of the sensations to be expected. And whether it is with expectations of dizziness from speed or height, or a sensation of floating thru space, or with a blind trust in the pilot with whom they are stepping into the unknown (as unknown any new experience must be) it seems that the passengers on their initial flight are surprised at the absence of thrill or sensation. These expectations are displaced with a feeling of security and comfort enhanced by the broader vision of things as viewed from the air.

In taking off from the new field it is hard for the new passenger to tell just when the machine leaves the ground and takes to the air, and he is likely to be just a little uncertain about it were it not for the gradual rise of the aeroplane from the ground. In the cabin type aeroplane, shut off from the wind, it is not greatly different from riding in an automobile on a smooth pavement.

Even in cool weather there may be an occasional "bump" which is likely to pass unnoticed unless it is mentioned by the pilot. As you rise higher there is no sensation of speed, as with rising height, the ground seems to pass more slowly beneath you, and you see the country which was familiar to you on the ground, spread before you like a colored map. Naturally detail is lacking unless you are looking for detail, but in many ways it is plainer than when viewed at an equal distance on ground. Your attention is more likely to be attracted by a shadow than by a small object itself and objects in shadow are likely to go unnoticed. Also a person is more quickly seen if they look up at an aeroplane.

The ground will look level, much more so than it really is, and as the vision is much broader, the passenger is likely to be surprised at the much more beautiful view of the country.

Stunt flying with passengers is limited by law, and were it not for the limitations, the pilot would be able to give real sensation as well—sensation and thrill which would not be easily forgotten. Even with the restrictions, the pilot can give you a taste of some of these sensations in the sharp turns which they are allowed to take with passengers who are looking for a thrill.

As the pilot shuts off his power and glides towards the ground, the passenger regrets that his first flight is about finished, as he would like to look a little longer for familiar landmarks.

SERUM SUPPLIES TO BE PLACED OVER PROVINCE

Hope was expressed on Monday by Dr. A. C. McGugan, Provincial Medical Officer of Health, that a wave of infantile paralysis that has swept over certain sections of the Province had subsided. No new cases are being reported.

With a view to guarding as far as possible against the spread of the disease and to make all possible preparations for coping with it, the provincial laboratory has arranged that supplies of serum would be placed at the following strategic points: Edmonton, Calgary, Lethbridge, Medicine Hat, Drumheller and Hanna.

Fortnightly Crop Report

Wheat cutting is well advanced in the southern part of the Province, general in the central area and has commenced in the northern districts including Peace River.

In the south-eastern area the quality of grain is high but the yield is uniformly light. Farther west crops on summerfallow are giving returns of from thirty to thirty-five bushels per acre. On all spring prepared land the yields will not be large. Irrigated areas report all crops slightly above average.

In the central eastern part of the Province all grains have suffered severely from wind and drought. Crops are short and in many instances ripening is uneven. Late rains have caused excellent growth on fields seeded to oats and barley and there will be a fair supply of feed. There have been several rather severe hail storms in this area which have caused heavy losses.

In the western and northern areas prospects are satisfactory in quality and yield. The recent dry period in the Peace River district has slightly reduced the yield of oats and barley.

Rains have been general over most of the Province in the past few days and pastures are much improved. Sugar beets and potatoes are making excellent progress.

STELLAR GROUP PLAYS IN CLEVER MAUGHAM DRAMA

Husbands have a habit of drifting away from their own firesides, at least some husbands have, and it is around this habit and its cure that W. Somerset Maugham wrote his delightful half-serious, half-humorous drama, "Charming Sinners." This picture, with Ruth Chatterton, Olive Brook, William Powell and Mary Nolan in the leading roles, will show at the Carbon Theatre on Friday and Saturday of this week.

"Charming Sinners," is the story of a wise wife and a philandering husband. Ruth Chatterton as the wife handles her husband with such finesse that she brings him back to her own fireside, contrite and resolved to amend and sends the "other" woman back to her husband, presumably to try her wiles in other pastures. It is a story of wifely wisdom and finesse pitted against a woman's youth and attractiveness and a man's weakness.

Robert Milton, one of Broadway's great drama and musical show producers, lately attracted to moving pictures, directed "Charming Sinners." It is the second W. Somerset Maugham play that Paramount has filmed within the past few months.

He can feel contact with the ground as the wheels touch, and the machine taxis across the field, coming to a stop. From then on, he is a flying enthusiast.

HAVE YOU PAID YOUR SUBSCRIPTION YET? NOW IS THE TIME

TENNIS NOTES

The postponed match in the Carbon and Acme Boys' tournament was finished on Thursday last. N. Nash of Carbon defeating Stan Young, Acme, 6-3, 6-0. The result of the tournament was a win for the Carbon boys by 4 events to two.

The Carbon Tennis Club held a Junior Singles Competition this week for a prize donated by the president, L. Poxon. The following are the results and scores.

First Round—W. Poxon defeated W. Peters 6-1, 6-2; J. Morgan defeated J. Fairbairn 6-2, 6-3; N. Nash defeated R. Wise 6-1, 6-3; C. Poxon defeated H. Edwards 6-0, 6-3.

Semi-Finals—J. Morgan defeated W. Poxon 6-4, 6-4; C. Poxon defeated N. Nash 6-4, 6-2.

Final—J. Morgan defeated C. Poxon 6-3, 6-3.

The Drumheller Open Tennis Tournament will be held on August 31st and September 1st (Labor Day). This year in addition to the open events there will be events open to this district only, consisting of Men's Singles, Ladies' Singles and Mixed Doubles. It is expected that a number of the Carbon players will take part in this.

TELEPHONE TO R-100

Something in the nature of a land to air communication record was established recently during the flight over Ottawa of the dirigible R-100, when station CNRO of the Canadian National Railways chain of radio stations, located in the Chateau Laurier Hotel, not only maintained two-way telephone conversation with the airship while she flew over the city, but also re-broadcast the conversations to Toronto, Quebec and Montreal. The conversation from the officers and technical observers aboard the airship was slightly distorted but clearly distinguishable, and the experiment was much more successful than had been anticipated.

Home Canning is Essential

In spite of the fact that millions of cans and bottles of excellent delicacies will be distributed by commercial canners, everything points to an exceptionally large year of good old-fashioned canning in the home.

Never before have we been so enthusiastic over the value of fruits and vegetables in the diet. For this reason alone we should be anxious to prepare a goodly quantity for winter consumption.

Fortunately, sugar is selling at as low a price as we have known since before the war, so that this particular ingredient does not need to cause us any financial worry. Incidentally, few appreciate the real value of the sugar used in canning and preserving. Not only does it bring out the flavor of the fruits and vegetables, but it furnishes quick-energy food during the winter months.

See to it that you can some beans, beets, corn and peas this year as well as your usual amount of berries and fruits.

The following steps should be taken and followed carefully in canning vegetables:

1. Clean the vegetables and pare if necessary.
2. Parboil or pre-cook as directed in the recipe.
3. Pack in sterilized jars. Those with glass tops and clamps are the best.
4. Add salt and sugar, and hot water to fill jars.
5. Put new rubber rings in place; adjust tops but do not close them quite tight.
6. Place in steam pressure cooker and sterilize as long as specified in the recipe.
7. Remove from canner and seal tight at once. Place where a draft will not strike them while cooling.

LIBERALS GAIN SEAT IN PROVINCIAL HOUSE

In a written judgement handed down last week, His Honor Judge Taylor of the District Court at Edmonton, declared Captain H. H. Dakin, Liberal, elected for the Beaver River constituency with a total of 1,036 votes as against 1,032 for J. Amos DeLisle, U. F.A. candidate, and sitting member, who was formerly declared elected by the returning officer.

Captain Dakin will be declared elected by the chief electoral officer unless within two days Mr. DeLisle takes an appeal to a judge of the Supreme Court.

By the Liberal win of this seat the standing of the parties in the seventh Legislative Assembly will be as follows: United Farmers of Alberta, 39; Liberals 14; Conservatives 6; Labor 4; Independent 3.

School Starts September 2

The Carbon School will re-open on Tuesday, September 2nd, and all children beginning school for the first time are required to be six years of age by September 1st. Parents or guardians will please co-operate by giving their children a slip on which the day, month and year of birth of new pupil are written.

The following staff of teachers has been engaged for the coming term:

J. A. Connolly, Principal and High School grades.

J. M. MacDonald, Grades VI, VII and VIII.

B. Ramsay, Grades III, IV, and V.

Miss K. Ramsay, Grades I and II.

McKINNON GETS FOUR YEARS BURNING TWINING ELEVATOR

J. W. McKinnon was sentenced to four years in the penitentiary when he pleaded guilty to burning the Bawlf elevator at Twining, of which he was in charge and also admitted that he had obtained the sum of \$2,000 from the Bawlf Elevator Company under false pretences. He had turned in grain tickets which were supposed to represent grain bought and placed in the elevator which he burned.

EXECUTIVE OF FAIR DISCUSS PROBLEM

SCHOOL FAIR MEETING DECIDES ON ALL JUDGING SAME DAY

At a meeting of the Carbon School Fair Executive held on Saturday, the 23rd of August, it was decided to have all the judging done on the regular Fair day, Thursday, September 4th. All exhibits should be brought in as early as possible on the morning of the Fair, so that the work of judging can be finished early.

The following committees have been appointed to be in charge of the exhibits:

Livestock, J. Atkinson and T. Barber.

Cooking and Sewing, Mrs. S. N. Wright.

School Work, J. A. Connolly.

Sports, J. M. MacDonald, H. Jealous and Bruce Ramsay.

Vegetables, L. B. Hart.

Grounds, D. Code and J. Ramsay.

ALBERTA WHEAT CROP GRADING HIGHER AND WEIGHING MORE

Alberta's 1930 wheat crop is grading higher and weighing heavier than any in recent years, according to record at the Dominion grain inspection office covering receipts from the new crop now arriving at the rate of 40 to 50 cars a day.

Included in last Tuesday's receipts of sixty cars were forty-five cars of new wheat, and in no case was the grade placed lower than No. 2 Northern, with a predominance of No. 1 Northern and No. 1 Hard. Of the hundred or more cars inspected to date, not a single one has graded below 2 Northern, stated officials of the inspection department.

An interesting feature of the early receipts is the exceptionally heavy weight of the grain. Heading the list recorded is a carload of No. 1 Hard from Jamieson, Alta., weighing 67 pounds to the measured bushel. Cars from Coaldale and Wilson each graded No. 1 Hard and weighed 66 and 65 pounds to the bushel respectively, and cars of No. 1 Hard, weighing 64 lbs. were sampled from Macraeth, Barons and Welling.

We know a woman who has found a book on Child Psychology very helpful—she uses it as a paddle.

NEW STOCK OF SCRIBBLERS

Exercise Books—Pens—Pencils, etc. Exercise Books, 7 for 25c; 3 for 25c; 2 for 25c; 2 for 95c; Scribblers 7 for 25c; 3 for 25c.

When a student buys 50c of Exercise Books and scribblers he is privileged to obtain a looseleaf note book (regular 35c) for 15c.

BRIEFLY TOLD

The first member of the Canadian navy to qualify for pension is Charles J. Hill. He enlisted in 1911.

The coronation of King Carlos II., of Roumania, has been definitely postponed, and will take place in the spring of 1931. Queen Helen plans a prolonged absence on a journey.

An order sheet of the Fascist party states that the total death, in Italy, of the earthquake of July 23, numbered only 1,475, in contrast to the previous official total of 2,142.

The Canadian Wheat Pool now has a membership of 142,000, the number of members having increased by more than 2,000 within the year, according to Gillis Percell, of the Canadian Press.

Drastic action to end the recent hoarding of silver coin in Russia has been taken by the Soviet secret police. Four men, convicted of counter-revolutionary activities, were arrested and shot. They were a speculator, cashier, and two traders.

The dumping of inferior gasoline by United States companies into the Canadian market has severely hit local oil refineries. Toronto refineries have been forced to lay off from 25 to 90 men because of the dumping of this oil.

In a further effort to bring before the people of the province the great variety of the products of farm and factory, the Made-in-Manitoba Committee of the Winnipeg Industrial Development Bureau is staging an extensive publicity program.

Records at Meridian Cabin, at the entrance of Prince Albert National Park, reveal that 14,000 persons have entered Saskatchewan's playground since the opening of the present season. Park officials are confident the 1930 total will reach, if not exceed, 20,000 before the season ends.

Development of a petrified forest six miles east of Drumheller, Alberta, was discussed by the Drumheller town planning commission, and a recommendation made to the Parks Development Board of Alberta that a survey of the bad lands in the vicinity be made with a view to the creation of a national park.

Canadian Cheese Grading

There has been a steady improvement of the quality of cheese year by year since grading was undertaken by the Department of Agriculture at Ottawa, about seven years ago. The chief of the division of dairy produce in the department states that a new mark has been set in 1929 when 93.1 per cent. graded were found to be of first grade.

Technical School For Saskatoon

Technical education in Saskatchewan will be promoted by a new technical college in Saskatoon which will afford accommodation for a thousand students.

The Wheat Stem
Sawfly

By Major H. G. L. Strange, Director
Agricultural Research Department,
Searle Grain Company, Limited

This insect, which up till 1914 had only been the cause of a comparatively small amount of damage in Western Canada, and that in Manitoba alone, has since that date rapidly spread over Saskatchewan and Alberta, and is now damaging crops almost up to the Rockies.

Entomologists who have given the sawfly a great deal of investigation and study, are of the opinion that the sawfly is with the wheat grower to stay, and that the control or partial control of sawflies will have to be one of the operations of the wheat grower that will rank in importance with any other farm operation.

The wheat stem sawfly normally lives in the prairie grasses, but of late years has developed a liking for wheat, and is damaging crops and causing direct money loss to farmers more and more each year, until today the losses due to the sawfly are estimated to run into millions of bushels per annum in each of the Provinces of Manitoba, Saskatchewan, and Alberta.

Neglect of any attempt to control the sawfly has resulted in some years in from seventy to one hundred per cent. loss in certain districts in the West.

Fortunately, however, in the majority of wheat growing districts at the present moment, the wheat stem sawfly only operates and damages wheat around the edges of the fields, particularly around the edges of those fields that are growing a crop on stubble.

Entomologists who have given particular study to the sawfly are of the opinion, from the result of their careful investigations and experiments, that no cultural methods are really very effective in the control of this insect pest.

They have found, however, that there is a certain and definite way to minimize the damage to wheat, and in time avoid any damage whatever.

This is by the seeding of what is called a "trap crop" around the edges of the fields, and in addition around the edges of any sloughs or water-courses inside the fields where the native grasses can grow, because it is in these native grasses that the insect usually lives over during the winter.

Oats make a very good "trap crop." The sawfly lays its eggs in the oats and eventually becomes drowned out in the stem. The oats, however, must be seeded before the wheat.

By far the best "trap crop," however, is brome grass, and it has been found that if a permanent crop of brome grass is maintained completely around the edge of a field, the brome grass strip to be from eight to ten feet wide, then the field will be almost certainly protected from sawfly damage. The brome grass can be cut for hay or can be allowed to mature and cut for seed.

Unless some effort is made along the lines indicated, the entomologists assure us that the losses from sawfly damage will steadily increase.

Sometimes a crop that is known to be affected with sawflies can be saved by cutting on the green side before the wheat stem has been cut by the sawfly. This, however, is only a temporary method, because the grade of the threshed grain is usually reduced.

A permanent trap of brome grass is the only sure method advised.

Wheat growers should note carefully those fields which are damaged this fall and take means to combat the trouble for next year.

Universities, Dominion Experimental Farms and Government Departments of Agriculture will gladly supply further details of this damaging pest.

Area Of Manitoba

The area of Manitoba is 251,832 square miles according to information furnished by the Dominion Government. Of this area, the Topographical Survey, Department of the Interior, has issued thirteen sheets of the National Topographic Map of Canada, either wholly or partially in the province. Each of these sheets covers an area of approximately six thousand square miles.

The world now has 7,000,000 acres of land planted to rubber.

Minard's Lintment removes Warts, relieves Bunions.

SUNDAY SCHOOL LESSON

AUGUST 31

AMOS—A HERDSMAN CALLED
OF GOD TO BE A PROPHET

Golden Text: "I heard the voice of the Lord, saying, 'Whom shall I send, and who will go for us?' Then I said, 'Here am I; send me'."—Isaiah 6:8.

Lesson: The Book of Amos.
Devotional Reading: Isaiah 55:1-7.

Explanations and Comments

The Time Of Amos' Prophecy, 1.1.—Amos was a herdsman of Tekoa (a small village of Judah), who lived in the eighth century B.C., in the reign of Uzziah, king of Judah, and Jeroboam II., king of Israel. Uzziah reigned forty-five years in Judah (782-737 B.C.), and somewhere in that reign occurred an earthquake so startling and devastating that the Judeans dated events from it, just as they often dated them from the deliverance from Egypt. It was probably 755 B.C., "two years before the earthquake," that Amos wrote his book, the first of all the prophetic books, wherefore he is called "the father of written prophecy."

"Two years before the earthquake! What an ominous beginning. But no words could better introduce the stern book of Amos. The world into which it ushers us is a world crowded with wrong of every kind — of false worship and social injustice. Such a world needed to be shaken and Amos knew that it would be. That, indeed, is the burden of his message; and already in the opening words the rumbling of the coming shock is heard. Sharp ears, however, were needed to detect it. To the average man of those days, society must have seemed stable enough, for the brilliant reign of Jeroboam the second had been marked by peace and prosperity. But not far beneath the shining surface the clear eyes of Amos saw the symptoms of rottenness and inevitable decay; and the words of his first recorded message are that Jehovah, the God of this easy-going people, would roar from His temple in Jerusalem, like a lion just before he makes his spring. The implication is that Jehovah will soon spring upon His people, to tear them in pieces; and Amos' message we might describe as the Gospel of the Lion's Roar."—J. E. McFadyen.

The Prophet Must Be Jehovah's Agent, 3.7, 8.—Amos proclaims his message because he must: God had revealed to him His secret of Israel's doom, and as every one fears when a lion roars, so when Jehovah speaks, as He had spoken to the soul of Amos, how could the prophet help delivering his message? "Amos himself is in the grasp of that great law which explains and runs through all the phenomena of the universe, or rather of that great Person who is behind all phenomena. The great Cause which explains the prophet's appearance and justifies his message is Almighty God Himself."

London is to have a children's museum, containing toys and clothes of children of all ages and races.

Ruins of streets, shops and villas of one section of ancient Carthage are being excavated.

An Amazing Exploit

Two Young Boys Set Out To Sea In
A Stolen Yacht

An amazing exploit by two London, England, boys, aged twelve and thirteen, who set out to sea in a yacht, was revealed recently.

The boys, who lived at Hornsey, filled two suitcases with bread, meat and bottles of water, and travelled to Southend. They waited until darkness fell, and then crept over the mud to the racing yacht "Nomad," which was moored off Leigh. On board the yacht, they lay down to sleep until the tide rose.

When the "Nomad" was afloat, they cast off the moorings, hoisted the mainsail a few feet, and with the tiller lashed, began their adventure.

Neither of them knew anything about sailing, but they determined to go to Dover and return, so that their school mates would acclaim them as heroes.

But the plan miscarried. The yacht drifted helplessly about the Thames estuary, all through the night. Liners constantly passed her, and the boys several times narrowly escaped being run down.

Then, in the morning, the yacht was seen drifting towards the harbor at Sheerness. Boatmen put out and were able to save her from crashing into the harbor wall. The boys were lying, helpless and frightened, in the cabin.

A waterman sailed the yacht back to Southend. On the way, the yacht was seen by the owner, Major W. J. Edwards, of the Essex Yacht Club, and he intercepted her in a motor launch.

The death penalty for crime has been abolished in Denmark.

BOILSO
GO OVERNIGHT

"Many Boils on neck. Doctor said lance. Tried 'Sootha-Salva' first; boils vanished overnight." C. T. Scott.
"Sootha-Salva" stops pain in 1 minute; boils go in few hours. At all druggists.

Memorial To Ben Eielson

Alaska To Pay Fitting Tribute To
Her Pioneer Aviator

Alaska's memorial to her pioneer aviator, Col. Ben Eielson, will be a \$100,000 aeronautical engineering building at the Alaska Agricultural College and School of Mines, the farthest north college in the world.

The campaign to raise the fund for its erection is being sponsored by the American Legion posts of Alaska, under the leadership of Dorman Baker, Post No. 11, of Fairbanks, Alaska, whose flag Eielson carried on his flight with Sir Hubert Wilkins across "the top of the world," from Point Barrow to Spitzbergen.

Since the finding, last February, of the bodies of Eielson and his mechanic, Earl Borland, who were instantly killed in the crash of their plane on the way to rescue passengers and cargo from the ice-trapped ship Nanuk, there has been a growing sentiment in Alaska to establish an appropriate monument to Eielson's memory.

Guard Against Thefts

The London Daily Herald reports that it was understood extra precautions were being taken to guard against further thefts of priceless art treasures from Buckingham Palace. Several such thefts have occurred recently, with America declared to be the chief market for stolen pictures.

Acid
Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

HER FAT IS MELTING FAST AWAY

All over the world Kruschen Salts is appealing to girls and women who strive for an attractive, free-from-fat figure that cannot fail to win admiration.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." Don't miss a morning.

Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's six life-giving salts is carried to every organ, gland, nerve and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

CHAPTER XXIV.—Continued.

So, alone at the window, Grandma watched her old friend carried by to his last resting place, followed, it seemed to her, by all those to whom he had ever ministered. Wickfield's elite in shining automobiles; shabby flivvers from the country with sad faces peering from behind torn side-curtains; farm horses harnessed to well loaded carry-alls or buggies; a long, long line on foot following the others. And last, straggling behind them all, hurrying breathlessly, a woman trundling a baby in a dilapidated go-cart—a baby whom the old doctor had helped into the world only a few months before. . . . Yes, all Wickfield was there, thought Grandma. . . . No one had forgotten.

"And God shall wipe away all tears from their eyes," she murmured softly. "And there shall be no more death, neither sorrow, nor crying."

CHAPTER XXV.

"What a thrilling, beautiful world it is!" mused Charmian, as she walked home from school one afternoon. It's a crime not to feel light-hearted every minute. I believe I should if it wasn't that John is leaving us. Grandma will miss him terribly; and so will I."

Yes, in another week the little office would be closed again, and the ell bedroom crying for an occupant. John Carter had stayed until a furnace fire was no longer necessary. On that he had insisted. He had been surprised and infinitely touched when Gam Garfield told him that all the doctor's worldly goods were now his own.

"Did Edward leave him everything?" she queried.

"About everything there was—the house and furnishings. All bills were to be settled (there weren't any to speak of), and any unpaid accounts on his books were to be cancelled. Two hundred dollars to Charmian, for a keepsake, and the rest to John Carter. Yes, the young man was bowled over. Not a great legacy, but it showed that our old doctor loved and trusted him. And of course we all know how he loved Charmian. Wickfield will never be the same without him, will it, Grandma?"

Grandma sighed and answered: "Not to some of us; and yet, Gam, it's a wonderful thing to live a long life and then die in the harness be-

fore you get to be a burden, as Edward Howe did. I couldn't wish him back. Just look at me!" she said, exasperated. "Here I sit all day long just watching the passing—don't even get out of my chair when some one comes in for a spool of cotton—no earthly use except to keep Charmian company, or—"

"No use!" exploded Gamaliel indignantly. "I donno any one 'round Wickfield who's any more use! You've listened to and sympathized with all our troubles for twenty years, Grandma Davis, to say nothing of all the years before when you were always ready to lend a helping hand in time of trouble. Many's the time I've heard my father say, 'Polly Davis is a good friend.' And you're a good friend still. I haven't got one I value any more, and there's mink a Wickfielder who'd say the same."

"You're a good friend, too, Gam," smiled the old lady, patting his hand affectionately. "I'll never forget how you persuaded Deacon Purdie to give up that law suit, just so's I wouldn't get into trouble about those beads. There's times when I get thinking over that transaction, that I'm the least mite worried."

The lawyer grinned. "You can rest easy if that's the worst sin you're got on your conscience! Once I bought a horse of the deacon—ought to have known better, of course; but I was a young sprig then and thought I knew the world—likewise a horse. But I was mistaken in both cases. I wouldn't worry about those beads, Grandma. Well, I must trot along. I wanted to see Charmian and tell her she'd fallen heir to a legacy, but you can break the news instead. What'll she do with it, do you think?"

Grandma's face clouded as she replied: "Most likely she'll shingle the roof, and fix the leaks in the back hall. I wish we were more common-sensible, Charmian and I. But there! 't would break our hearts to leave it, so what's the use? And if Charmian wants to use the doctor's legacy to keep us here a little longer, I'm sure Edward Howe would be the last one to think her foolish."

It was on this very subject that Charmian was meditating that May afternoon as she walked home from school.

"It's too lovely a day to spoil with worry," she told herself, "and I've got to face things sometime. It's not just John himself that we're going to miss, but the money he pays for board and rent. Summer's coming, and we can weather that, thanks to the dear old doctor for helping me to do some of the repairs; but next fall—Well, 'sufficient unto the day is the evil thereof.' I won't worry—yet. Somehow this day makes me think of Jim. He was rather inarticulate about it, but he said once when he was a little boy, that the smell of apple blossoms made him feel 'funny all over,' and it's my private opinion that it has the same effect on him now. I wonder if May is half as lovely in California as it is in Wickfield. I'm inclined to doubt it. I wonder if Jim is ever coming back—even for a visit. I wonder. . . ."

A sharp rap on a window pane informed the girl that she was passing her own front door. She looked up, laughing, and said as she went in to Grandma: "I was in a trance. I'd have walked into a river if there'd been one handy. It's such a beautiful day, Grandma, that I got to dreaming. What's been happening to you?"

"Not much, childy. The doctor couldn't stop to do the dishes, but Lizzie Baker found 'em in the sink when she came after some flour, and did 'em up. She forgot to rinse out the dish towel, but she was real kind to help anyway, and I told her not to return the flour—it was only half a cupful. She's had another letter from Sarah Bennett, and what do you think has happened? That Darling girl, the one that set Wickfield on end with her green hat, has been out to California on a trip with a girl friend. They stopped to call, and Sophie invited 'em to stay a day or so. Jim's been escorting 'em around, showing 'em the sights, and I guess he's been too busy to write to you. My stars! that reminds me a letter came this morning. I was crazy to open it, but that's one crime I've never committed—opening other folks' mail. If a letter isn't private, I'd like to know what is."

"You could have opened it, of course, Grandma," said Charmian, bringing the letter and seating herself in the old rocker. "Jim wouldn't say anything you couldn't see. I'll read it aloud: 'Dear—'" Charmian paused, then looked up at her grand-

mother with a puzzled frown. "He says, 'Dear playmate.' He never called me that before."

"You've been playmates all your lives, haven't you?" replied Grandma literally. "I think he just means to be friendly."

"Friendly!" echoed Charmian. "Well, I guess you're right, Grandma, as usual." Her voice was the least bit hard, and the color had sprung into her face. It was still there when she finished reading. "He's evidently enjoying the fair Clara's visit," she said coldly. "And he's got the California fever, too. I wonder if he's forgotten a New England spring."

He doesn't say a single word about coming back. Well, if Jim Bennett wants to spend his life in a stucco bungalow with a palm tree for shade, he's welcome."

She tossed the letter onto the table contemptuously and went upstairs, while the old lady's eyes followed her retreating figure with a blending of amusement and distress.

"I donno what's in that letter to upset her so," she mused; then reached for the despised missive and read it through. "Charmian," she called when she heard the girl's step upon the stairs, "come here. I guess maybe you overlooked Jim's postscript."

"Postscript?" said Charmian, a note of hope in her voice, though her eyes were cold. "Well, what is it?"

"Here," said Grandma, and handed the letter to her irate granddaughter, who, going closer to the window, read:

"Charmian, when our old crab-apple tree is white with blossom, will you pick an armful and carry them to the cemetery for Doctor Howe? He told me once that something about those blossoms always reminded him of his Kate—they were so pure and exquisite; and after that I took him a big bunch each spring—used to put 'em in a bowl on the desk in his office, where he'd find them when he came in. I don't want him to miss them now; and you're the only one I can ask who would understand. You do, don't you? Jim."

"Well," said Grandma, as the girl's hand holding the letter, dropped limply to her side. "I donno but I'd rather a boy would think of doing a thing like that, than to have him appreciate small-pane windows. I donno but—"

She paused, looked up, and her lips broke into a knowing smile. She was talking to an empty room!

CHAPTER XXVI.

On a morning in August Charmian unlocked the door into what had so recently been John Carter's office, and opened the casement wide. The floor was no longer covered by the soft Bokhara; the windows were bare of hangings; the bookshelves empty. Only the tall brass andirons gleamed a welcome from the blackened hearth; and the girl wiped the dust from Great-grandfather Davis's old chair, and looked appraisingly at her surroundings.

As she did so a brisk step sounded on the sidewalk, and in another moment the doorway was blotted out by George K.'s ample figure.

"What you up to this morning?" he questioned genially. "Saw the door wide open, and thought I'd take a look. Kind of bare, isn't it, since your doctor departed? But it's a pretty place in spite of that."

"Come in," smiled Charmian. "You're the one person in Wickfield I want to see."

"You flatter me," replied George K., and smiled.

"Sit down," she said. "This is the only chair, but I'll perch on the desk if you don't mind. Uncle George, I'm sick with indecision on a lot of sub-

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes:—"Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

jects; but one thing's clear: I've got to give up the school."

"I've been expecting that," the banker responded. "Only last night Salina was saying that Grandma—well . . ."

He hesitated; but Charmian asked bravely: "Then others have seen it, too?"

George K. nodded, and the girl went on: "She's failed this summer—not in her mind, thank heaven! but she's not so brisk and happy as she was a year ago. I've got to be with her more. It was hard last winter, even with John Carter to help out. I'll never, never forget how good he was to her, running in between patients to see if she needed anything—getting her lunch—jolly her along and keeping her happy and contented. I'll be grateful to him as long as I live; but things have changed. She needs me now, and I can't be away all day. But—but I'm afraid, Uncle George, that we'll have to sell the house."

"And live here?" he questioned. Charmian nodded because it was hard to speak; but after a moment she continued: "It was Doctor Howe's idea. He must have realized that the time would come when I couldn't make both ends meet. Oh, if I could only have kept the house as long as Grandma lived! I dread to tell her."

George K. arose, suddenly. He went to the window, his back to Charmian, and blew a loud blast upon his nose. When he turned he said with a good attempt at cheer: "You needn't dread it, Charmian. Grandma's a brave woman; she won't flinch. Look here, child, if I gave you an allowance just as if you were my daughter, and—and—"

"Oh, Uncle George!" cried Charmian. "How can I be downhearted when I've got friends like you? Of course you can't give me an allowance; but perhaps you can help me sell the house. That must be done before I can go ahead and make this livable. The only trouble is—will anybody want it?"

The banker nodded. Charmian was looking through the open casement toward the homestead that was her greatest pride. She said, at last: "It ought to be, of course; but it'll be hard to see strangers come in and out of the old house. Who wants it, Uncle George?"

George K. hesitated a moment before he answered: "I'm not at liberty to say at present; though I don't see why. It's some one who's driven through Wickfield frequently, and taken a fancy to the place. He's a young man, who, I believe, is going to be married; but he said there'd be no hurry about your getting out. In fact, he'd like you to stay on for a while, as caretaker, and superintend the necessary repairs. I suppose when it comes to any real remodeling he'll get the verdict of the lady in the case. That's all I know."

"Then you really mean that the house is as good as sold?"

"I'm sure of it. I'll drop him a line today and ask when the papers can be signed. As for this little place, Charmian, with a few alterations it can be made delightful; and Grandma will be happy knowing your work is lighter. It's without doubt the sensible thing to do."

"Well, so long," smiled the banker. "I'll let you know what I hear from your purchaser, my dear."

Charmian stood at the window watching him cross the driveway and disappear under the golden pineapples.

"I believe," she mused, "that the whole thing will be easier now it's settled. This will make a darling living room. Grandma will get a better view of the street from this window than from the old one. I can sleep on a couch in here, and Grandma can have the other room. Of course it's the only thing to do! Why, hello! where did you come from?"

This question was addressed to John Carter, who stood, as George K. had an hour earlier, in the doorway. At Charmian's greeting he came forward, tossed his hat onto the desk, and answered: "I couldn't

resist the lure of that open door. I never pass here, Charmian, without a homesick twinge. Never again shall I have an office that so exactly suits me; and I miss you and Grandma more than you'd guess. You see, there's not enough sickness this time of year to keep me from thinking of things that had better be forgotten. Well, let's forget 'em!" he said more cheerfully. "What brought you here this morning, may I ask?"

Charmian told him, adding that the old doctor had made the plan for her; and that George K. had a purchaser for the house.

"So you see," she ended, "everything's done—except telling Grandma. I admit that I can't quite face the thought of that ordeal."

(To Be Continued.)

Persian Balm—the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and banishes all unpleasant roughness or chafing caused by wind and other weather conditions. Makes hands soft and white. Creates an elusive, essentially feminine charm. Persian Balm is indispensable to women of refinement.

Historical note: When Lincoln was elected to Congress from Illinois his campaign expenses, paid by his party, were 75 cents.

Toronto is to have a seamless-tube mill costing \$2,000,000.

For all Skin Abrasions—Minard's Liniment.

New South Wales, Australia, has banned all curb gasoline pumps.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Misfortunes may be turned into blessings by an indomitable will.

Minard's Liniment for Lumbago and Neuralgia.

Many a saint after death develops virtues he had not exhibited in life.

If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

MIXED FARMING THE ONLY SOLUTION

With the low price for Canadian wheat at the present time and the poor crop yields in this district for the past two years, it has come to the time when the farmers of Alberta and of this district in particular will have to go into mixed farming more extensively than they do. There is the complaint that this is not a mixed farming district and pasture land is scarce, and such may be the case with a few, but on the whole every half section of land contains some pasture land, and where there is no pasture to be found the farmer will have to put in more green feed. The feeding has always been a local problem and one which can be solved with the silo and green feed, even though a certain amount of hay will have to be shipped in.

Many of the farmers complain that it takes money to put in breeding stock and that the reason they are not going into the raising of live stock is that they have not the ready cash. Where this is the case and where a farmer is willing to co-operate, we believe that help should be forthcoming from the Provincial Government in such cases. The future of Alberta will not depend on the wheat crop alone, but it will depend on the farmers and the crops they raise in the form of livestock as well as wheat. Where the farm produces a small wheat crop, but where a few hogs, cattle and chickens are kept, you will find prosperity at all times. Where everything depends on the wheat crop, times are flourishing when conditions are excellent, but when climatic conditions as we have had in the last two years prevail, times are hard and the average wheat farmer cannot make both ends meet. He must have something else to rely on. He must have livestock. The sooner our farmers realize this the better it will be for us all.

RENNETT'S OPPORTUNITY TO REDEEM HIS PROMISES

The Manitoba Free Press says that "with a clear majority in Parliament the prospective Bennett Government should be in a position to carry out the pledges made by the party. There need be no anxiety about the unemployment situation in Winnipeg and other cities during the coming winter. The people have been assured that there was no reason why there should be unemployment and that it should all be cleared up in a few weeks. It is just possible that the Conservative party in office may discover that there is a municipal and provincial responsibility in regard to unemployment as well as a federal responsibility. But either the unemployment will be banished or that pledge will soon go by the board and the continuance of any considerable number of men in this condition will be a standing reproach to the party about to take office.

Another very definite pledge, the fulfillment of which will be of great interest to the public was that of protecting the consumer against rising prices due to increases in the tariff. In the tariff resolution passed at the Conservative convention in Winnipeg

in 1927 this matter was referred to as follows:

"Should it (the tariff commission) find that unfair advantage is being taken of tariff duties, it shall make recommendations, to be given effect to by the government, for reducing or removing tariff schedules or imposing special duties of excise upon products in respect of which such advantage has been taken, and its reports, findings and reasons therefore shall be laid before Parliament and then made known to the public."

Mr. Bennett was not so specific as this in his campaign speeches but he gave the pledge everywhere and in the most positive terms that the people would be protected from rising prices following tariff increases. When speaking in Winnipeg on June 9, Mr. Bennett said:

It will be the duty of the Conservative party to see that our tariffs can operate as well in the service of the consumer as the producer. Tariffs properly controlled will ensure our markets to our producers and internal competition will control prices. If any producer levies an excessive charge, I will put a stop to it.

"Rational employment of the principle of safeguarding of industry will not permit any producer to take advantage of the benefit, and the government of which I am the head will institute action to end that, or will perish in the attempt."

Mr. Bennett now has the field, or soon will have, and the consumers will watch with particular interest how this pledge is honored. If the duties are raised on motor cars or farm implements, the prices are to remain the same. If the tariff on woollens and silks goes up, such goods are not to cost the consumer any more. The Conservative leader gave this pledge from coast to coast. It was a very definite part of his tariff policy and its fulfillment will be expected. We shall see whether the experiment succeeds. In the face of the ingenious methods that will doubtless be used by protected interests to obtain the maximum benefit from tariff increases.

SUPPORT FROM WINNIPEG

(The Calgary Albertan)

Strong support for the Alberta coal mines is accorded by the Winnipeg Tribune in calling upon the people of Winnipeg to purchase Alberta coal. Alberta will be correspondingly grateful. If the coal consumers of Winnipeg heed the advice, and so help the cause of inter-provincial trade, their dollars will help materially in maintaining labor in the Red Deer Valley, Lethbridge, Crow's Nest and other mines this winter. If they do not their money will further the prosperity of foreign mines and miners while their own people are calling for help from their Government. And what Manitoba and Winnipeg will gain by the purchase of cheaper coal. If it be cheaper, from abroad they will lose by unemployment at home, besides foregoing the advantages of strengthening the sentiment towards reciprocal trading so strongly fostered by the Alberta government in its dealings with Manitoba manufacturers.

It is estimated that 500,000 tons of American steam coal find a market annually in Winnipeg apart from the shipments of anthracite and coke. The Tribune commenting upon the fact says:

"It becomes evident that the people of Winnipeg send several millions of dollars a year across the border for such fuels.

"Even under normal conditions, it is poor business to import coal when equally good coal can be purchased in the home market. This is so evident that for several years the Dominion government has provided a subvention for Alberta coal to enable it to compete in the Winnipeg market.

"If the policy of buying Canadian products deserves encouragement and public support when conditions are normal it deserves even greater support in times of business depression and unemployment. Every dollar that goes across the border for coal that can be supplied by Alberta mines makes it just that much harder for Western Canada. Every dollar that Winnipeg spends for Western coal not only promotes activity in the Alberta coal fields, but contributes in a very

Three Generations of Golfers

Golfers, like poets, are born, even though, unlike poets, they are also made. But when a six-year-old girl makes a par-four hole in seven including a drive across the Spray River, and when her mother at 17 was golf champion of Alberta, and when, further, her grandfather is the professional at the Banff Springs Golf Course—why then, you have to allow a little something for heredity. The above data cover the facts in the case of Lois Dalgleish 6-year-old daughter of Mrs. Peggy Dalgleish and granddaughter of William "Bill" Thomson, professional at the Banff Springs Golf Course since 1910. "Start them young" is a good rule in any sport, but is particularly applicable to golf. Lois' mother

began her golfing career at six but Lois herself commenced at four, when her grandfather purchased diminutive specially made clubs for the baby hands and spent hours of patient training with her—hours of spontaneously invented methods of teaching. The result is that a child of barely school age is doing what many adults and in fact many golfers cannot do, namely, making par four holes in seven strokes while her putting is beautiful to watch.

Lay-out shows the spectacular drive across the Spray River which features the Banff Springs Golf Course; the three golfing generations; Lois swinging for the drive across the river; and Lois putting—true as a die.

SUPPORT FROM WINNIPEG

(Continued from page 4)

definite measure to the commercial and industrial activity of Winnipeg itself.

"It is gratifying to learn that these truths are beginning to find expression in a practical way. One of the largest coal contracts in Winnipeg, for heating a large group of local buildings, now calls for 100 per cent Western Canadian coal. Private householders and others whose requirements can be served by Alberta coal have similar opportunity for helping out in behalf of a Western industry and for the good of the whole West."

All of this we applaud. It is to be hoped the argument for the use of Alberta coals will be strongly reinforced by price competition with the American coals now that a freight subvention is available. There are too many coal resources lying undeveloped in this province; too uncertain employment in the mining centres to allow the situation, by which foreign coal is brought hundreds of miles to be dumped into what should be our markets, to continue unchallenged.

BEARS ARE BESTED BY ELECTRIC CURRENT

Jimmy Rimmer, golf professional at the Jasper Park Lodge course, lives with his family in a stone house in the pine trees behind the 18th hole. For a long time, bears, which are a common place to Jasper golfers, annoyed him at night as they rummaged about the refuse tins in his backyard. Mr. Rimmer, who is versatile in

other things beside golf, ran wires from the electric light circuit of his house to the refuse tins. Now when he hears a bear playing about he closes the switch, hears a grunt and a heavy body crashing through the bush.

"There hasn't been a bear around my place now for weeks," he said recently. "They have probably found the food they could pick up in my backyard too strong for their digestions."

THE ROYAL RULES

It would seem at first glance that there is not a great deal in common between a King and a commoner. On hearing through the columns of The Churchman, of the personal code of Our Sovereign King George V, one rejoices to find that they are the strong, kindly sentiments which may be shared by even the humblest of his subjects.

History will relate to future generations that the reason the King was enthroned in the hearts of the people of his great Empire was simply that he lived honestly according to his creed and code.

These six sensible rules of living crystallize the best teachings of the wise of all ages. They are not easy to live up to, although simple in their essence. They are rules for the young as well as for the adult, and one feels that as an ideal for children going to school they cannot be surpassed.

Like the sins and objects of the world-wide children's organization, the Junior Red Cross, which numbers its twelve million members in every quarter of the globe, the Royal Rules

make for the best citizenship and the finest expression of service.

Let every student copy the following and do his best to live up to His Sovereign's code.

1. Teach me to be obedient to the rules of the game.
2. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.
3. Teach me neither to proffer nor to receive cheap praise.
4. If I am called upon to suffer, let me be like a well-bred beast that goes away to suffer in silence.
5. Teach me to win, if I may; if I may not, teach me to be a good loser.
6. Teach me neither to cry for the moon nor to cry over spilt milk.

Here and There

(538)

Taking turns while the engine was under a full head of steam, Engineer H. J. Storey and Fireman A. Fulkerson dumped the fire and entered the fire box of the engine to make running repairs of grates displaced from the grate carrier on Canadian Pacific engine 570 at Hope, B.C., recently. They could stand the intense heat only a few minutes at a time but they succeeded in their work and saved serious delay, bringing their train to destination within a few minutes of scheduled time. They were each awarded 10 merit marks, the railway's recognition of conspicuous merit.

Early three years ago May 24 last, the first transcontinental passenger train reached Vancouver over the Canadian Pacific Railway, leaving again next day. That was eleven months after the arrival of the first through passenger train at Port Moody, original terminus of the transcontinental line.

"Judging from present indications there is every reason to believe that the tourist traffic from the United States and from other Canadian provinces to the Maritimes will reach record proportions this season," says George S. Beer, recently appointed district passenger agent for the Canadian Pacific Railway at Saint John, N.B.

Three important appointments in the freight traffic department of the Canadian Pacific Railway have been announced by George Stephen, newly appointed vice-president in charge of traffic. They are:—C. E. Jefferson, assistant freight traffic manager, Winnipeg, to be freight traffic manager, Montreal; H. V. Gillis, assistant freight traffic manager, eastern lines, to go to western lines in the same capacity; and Gerald Ham, assistant general freight agent, Montreal, to be assistant freight traffic manager, eastern lines. The appointments were effective from June 1.

A ten day "all expense" tour of eastern Canada, covering 2300 miles, and including a visit to the Toronto Exhibition, world's greatest annual fair, will be conducted from the Maritimes by Professor H. L. Stewart, of Dalhousie University, next August. The tour which will take in most of the points and cities of interest in the territory will be over the lines of the Canadian Pacific, Dominion Atlantic and Quebec Central Railways and by Canada Steamships Line.

Six of the Canadian provinces, Nova Scotia, New Brunswick, Quebec, Manitoba, Alberta and British Columbia, have taken advantage of the Farm Loan Act of Canada, a Dominion Government measure under which long term mortgage credit is extended to Canadian farmers. At the end of last March loans to the total amount of \$4,351,000 had been approved.

Canada leads in the following:—Fur farming production; wheat and flour exports; world's wheat championships; railway mileage per capita; high grade wheat standards; world's per capita trade; newspaper production of the world; hydro power development per capita; life insurance per capita in the empire; world's largest inland port—Montreal; world's largest smelter of its kind—Trail, B.C.; and largest single-unit grain elevator in the world.

Asbestos production in Canada during 1929 set up a new high record, according to the finally revised figures of the Bureau of Statistics. Shipments in 1929 amounted to 206,655 tons, valued at \$13,172,581, an increase of 12 1/2% in quantity and 17 1/2% in value as compared with the previous year. The average value received by the operators was \$13.04 per ton compared with \$11.16 the previous year.

Nipigon trout, known all over the continent as the gamest of game fish, are coming into the spotlight again according to reports from the famous Ontario resort where the annual contest for the largest speckled trout is now in full swing and will continue until September 14. The best entry to date is a 5 1/2-lb fish, measuring 22 inches in length and 14 in girth taken with a single spinner with fly, on a 9 1/2-foot rod by Edmund Stalter, of Paterson, N. J., July 29.

East and West, Orient and Occident, will meet in the British Empire Piping competition, one of the most important of the new features to be introduced at this year's Highland Gathering and Scottish Music Festival to be held at Banff at the end of August. Pipe-Majors John Clark and E. L. Collins of the Royal Scots Regiment of Scotland, of which Princess Mary is Colonel-in-chief, will come from the British Isles, while Pipe-Major W. C. MacKie of the Scottish Company of volunteers is on his way to Banff from Hong-Kong.

Prospects for increased earnings during the fall months are good and directors of the Canadian Pacific Railway have no intention of reducing the dividend, said E. W. Beatty, chairman and president of the company, recently in reply to rumors that the dividend might be cut.

Nowadays the world moves on rubber and this does not apply to automobiles alone. According to a recent return of the Canadian Government the people of Nigeria in June bought 300 pairs of shoes with rubber soles from Canada. Barbados took 3,020 pairs and Trinidad 6,555 pairs. In June the export of Canadian automobile tires exceeded \$1,000,000 in value.

Canadian farmers are now producing all the fine tobacco required by Canadian manufacturers, according to a statement just issued by the Dominion Department of Agriculture which also claims that the tobacco is of better quality than that usually imported. Canadian tobacco has also become a factor in the British tobacco market.

An increase of 58% in motor tourist traffic from the United States to New Brunswick is shown in statistics for the 1930 season up to July 31 as compared with the same period last year, according to figures issued by the provincial government Bureau of Information and Tourist Travel from returns from Canadian Customs collectors at the 24 ports of entry along the International Boundary.

It is not generally known that the Prairie Provinces—Manitoba, Saskatchewan and Alberta—contain important commercial fisheries. In 1929 the commercial value of fish caught in these provinces exceeded \$4,000,000.

Herman Trelle, of Wembley, Alberta, former wheat and oats king, won first prizes at the Regina Exhibition for his Marquis and Reward wheats. William Darnborough, of Laura, Sask., was second in the Marquis class, and E. Thomson, of Pathow, Sask., came just behind Trelle in the Reward class.

Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

"SALADA" TEA

'Fresh from the gardens'

Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Babson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shelving it after a couple of trials. Of what good are blue prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own some day,—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice, until the savings habit is formed.

When it comes to "Investing," you have the choice between invoking the almost unbelievable power of compound interest when harnessed to regular monthly savings, on one hand; on the other, putting the money into well seasoned securities. In the first case you need no particular advice, for in its operation compound interest is both tireless and automatic. In the second instance, that is, with investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a shoe-string margin. Remember this, too. It is wise to keep a part of your funds in liquid form,—that is, in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each spare dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "sparing" power; that is your ability to save. You will be able to see with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your earnings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "godliness with contentment is great gain," in your finances as well as in the rest of your life.

Report On Gas Fields

Member Of Geological Survey Of Canada To Make Report On Saskatchewan

Dr. G. S. Hume, of the Geological Survey, of Canada, will make an immediate survey from all available data, of the prospects of finding gas in Saskatchewan, in suitable quantities within the province.

He will not make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings, at Regina, when Dr. Hume met five members of the Saskatchewan Government and also of the four-cities gas committee.

Is Baby Teething?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore; diarrhoea, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets concerning which Mrs. Louis Grubb, Teeswater, Ont., says:—"I have used the Tablets for all my babies while teething and have found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wheat Pool Membership

The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 2,000 within the year, according to Gillis Percell, of the Canadian Press.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

B.C. Hydro Development

Possibility of developing 3,000,000 horse-power from rivers along the coast district of British Columbia is disclosed by engineers.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with Douglas' Egyptian Liniment.

Crude Oil Consumption

At present only about 2½ per cent. of our crude oil consumption is produced in Canada.

Have Minard's Liniment on your shelf.

ENO'S "FRUIT SALT"

Doctors Warn Against Drastic Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

No Cause For Alarm

Says Russia Will Not Be Factor In Wheat Exportation For Some Time

Thomas D. Campbell, of Hardin, Mont., who has been called the world's largest wheat grower, returned recently from a trip to Russia as agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

As the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000,000 bushels of wheat annually, just as an example.

Pioneer Mountie Dies

Peter O'Hare, 77, pioneer mounted policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Hare was associated with all activities, taking part in the Riel Rebellion engagement. His service extended over 40 years.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Honey has become so popular in the British Isles that while 1,100 tons were produced there in the last 12 months, fully 3,500 tons, valued at \$2,000,000, were imported.

Encourage Sheep Industry

Economic Survey Of Sheep Ranches Of Western Provinces To Be Undertaken

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia, is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economics branch in co-operation with the Dominion Experimental Farms. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

TWICE BENEFITED BY SAME REMEDY

Recommends Lydia E. Pinkham's Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a nursing baby

to care for, I got all run-down and I took Lydia E. Pinkham's Vegetable Compound to get strength to do my work. Another time at Change of Life, I had severe headaches and felt tired all the time. I took seven bottles of the Vegetable Compound and felt like a new woman. I recommend it to any woman who is at the age when she needs building up."

—Mrs. T. E. SLEEMAN, R.R. 4, Cobourg, Ontario.

DRIVE ON LABOR PARTY STARTED BY CHURCHILL

Minster, Kent, Eng.—A plea for unification of the Conservative party in an effort to arouse the party's supporters and oust what he called "this wretched Socialist Government" was made by Hon. Winston Churchill addressing a meeting here. His speech seemed likely to be taken as the opening gun of a predicted Tory drive to defeat the Labor regime.

Personal and sectional aims should be put aside "to avert the decline and fall of the British Empire," the fortunes of which the former chancellor of the exchequer declared he never would have believed could decline so rapidly as they have done of late.

Mr. Churchill devoted much of his ammunition to an attack upon the way the MacDonald Government has been handling the Indian situation, particularly the way in which the Patan tribesmen had come down out of the mountains and were "molesting and insulting a famous city" with a large garrison of British and Indian troops.

"Such a lamentable spectacle would have been impossible in former times," he exclaimed. "It would almost seem that the same spirit of defeatism in high places which is so rapidly throwing India into chaos, has paralyzed military action at Peshawar."

The former chancellor, who referred to Mahatma Gandhi as "this malevolent fanatic," declared that no proposal of dominion status for India would pass even the present House of Commons. While saying this, he re-affirmed the "inflexible resolve of Great Britain to aid the Indian people to fit themselves increasingly for the duties of self-government."

He deplored the exclusion of Sir John Simon, who served on the recent parliamentary commission to India, as chairman for the coming round table conference, and expressed the conviction that the result of this conference would be "confusion worse confounded."

The former chancellor, who has engaged in many wordy duels with Rt. Hon. Philip Snowden, the Laborite holder of Great Britain's purse strings, said that he was unhappy about bad trade and unemployment. He put his views of the Conservative program briefly, asserting that the fall of the Labor Government would restore confidence in Britain and would spread from Britain around the world.

"Industry will be stimulated by a tariff," he said. "Agriculture will be aided by a guarantee. The dole will be purged from abuse and imposture and we shall bear out our part in the general revival of national and Imperial strength."

To Celebrate Victory

Six Premiers To Attend Conservative Dinner In Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada; and Provincial Premiers F. S. Tolmie, British Columbia; J. T. M. Anderson, Saskatchewan; G. S. Harrington, Nova Scotia; J. B. M. Baxter, New Brunswick; and G. Howard Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

Half a Million For Roads

Quebec, Que.—The sum of \$500,000 was voted by a special order-in-council by the Quebec government at a cabinet meeting for the use of road construction. This sum was added to the regular highway budget of \$12,000,000 and will be used in road building throughout the province, where the unemployment situation is most serious.

Victory Over Reds

Hankow, China.—Chinese press despatches said Kiangsi provincial troops scored a crushing victory over Communists in the western part of that province, killing 4,000 Reds and capturing 2,000 rifles.

W. N. U. 1852

Salvage Abandoned 'Planes

Two 'Planes Of McAlpine Party Are Recovered After Enduring Storms Of Last Winter

Edmonton, Alberta.—Beating the Arctic again, Canadian fliers and airplanes have triumphed in a far northern test.

The test constituted a drama in three acts. The first when the McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second act was while the machines remained through an Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvaging of the machines.

One of the monoplanes was the property of Dominion Explorers, Limited. A little over a week ago supplies of gasoline and oil were taken to the scene of the forced landing. The machine was "gassed up" and flown to Coppermine River, where, without overhaul it was placed in service.

On Thursday evening last, August 14, the second machine, the property of Western Canada Airways, was reached by Pilot Buchanan and his mechanic, and on Monday evening, August 18, the machine landed at McMurray.

So far as can be seen, the machines suffered no damage through their long stay in the Arctic. Their motors started without difficulty once fuel and oil were provided and there were no visible evidences of deterioration.

The Western Canada Airways machine will undergo a thorough examination at McMurray to determine if a complete overhaul is necessary.

Control Of Immigration

Report Of Royal Saskatchewan Commission On Immigration Has Been Submitted

Saskatoon, Sask.—Main outline of the report of the Royal Saskatchewan Commission on Immigration and Settlement has already been submitted to Premier J. T. M. Anderson, of Saskatchewan, and the full report will be printed immediately on completion, Dr. W. W. Swanson, chairman, announced here.

Findings and recommendations of the commission are expected to be unanimous, the chairman indicated. The commissioners have reached unanimity on all major issues. In view of the urgency of the question, both in Ottawa and at Regina, and because of changes already made in immigration laws, everything possible will be done to have the report printed immediately so that it may be made available, through the courtesy of the provincial government for the information of members of parliament at Ottawa and Regina.

The investigation has been a thorough one. Hearings have been conducted in all parts of the province. Since the commission was appointed last fall about 475 witnesses have been heard and personal investigations have been made by the commissioners.

Soviets To Export Grain

Large Exports Of Wheat, Rye and Oats Expected Next Month

Moscow, Russia.—Large exports of Soviet wheat, rye and oats are expected early next month, it was made known recently, although up to the present time only small shipments of rye have been reported.

The government has declined to give out figures of exports and the time of shipments, on the ground that to do so might affect the market.

The majority of rye crops already have been harvested in the Ukraine, of which the government has purchased about 25 per cent. The amount is reported much below the government expectations, although it is thought that purchases of fall and spring rye will be greatly increased soon.

Oppose Shorter Working Day

Victoria, B.C.—Claiming that it has not been shown that a five-hour day will either increase or spread employment, but rather that it will cause more unemployment, manufacturers of British Columbia will oppose the proposed cut in working hours according to information on the subject sent to the Victoria Chamber of Commerce.

PROMINENT MARKSMAN

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 900-yard range, winning the lieutenant-governor's match with 118 points.

Airplane Fatality

Pilot Is Killed Through Falling Into Propeller Blades

Owen Sound, Ont.—Climbing up on top of the 'plane to adjust the motor, George P. Parsons, 32, Toronto, was instantly killed when he fell into the whirling blades of the propeller. Prominent airmen believe it is the first fatality of its kind in the history of Dominion aviation.

Parsons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibian biplane to Wasaga Beach recently. The machine was the only one of its kind in the Dominion, it is claimed. The engine and propeller are situated overhead.

After considerable tinkering, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Montreal Bank Robbed

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the four employees of the Banque Provinciale, at 4137 St. Catherine Street, East, and a customer, and escaped with \$2,970 of the bank's funds by commandeering a passing taxicab. In their hurry, however, the bandits overlooked \$9,000 which was on a shelf in the teller's booth.

Canadian Beef For Britain

British Market Offers Great Opportunity For Canada

Montreal.—Canadian beef will re-enter the British market for the first time since 1928 with the shipment from Montreal this week of 128 head of grade Hereford and Shorthorn steers, bred in Ontario and now consigned to a firm of importers in Manchester.

The majority of the steers were raised on the farms of P. J. Henry, of Ricetown, Ont., and M. J. Campbell, of Dutton, Ont.

Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, once more offers remarkable opportunities to Canadian breeders, according to Donald Munroe, president of D. Munroe and Sons. One hundred and sixty thousand pounds of dressed beef were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

Much of the traffic could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef in the British market comes from the Irish breeders, but it is only seasonal competition and could be met with ease by concentration on the part of Canadian breeders and exporters.

Proposed Health Insurance

Compulsory Form Of State Health Insurance Mooted For B.C.

Victoria, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the B.C. legislature at its next session, according to reports current at the parliament buildings.

Although the royal commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that hearings will conclude and a final report will be ready before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

Plan Relief Work

Toronto, Ont.—Announcement has been made by Hon. William Finlayson, Ontario Minister of Lands and Forests, the government is completing a scheme of relief work in Northern Ontario to take care of many of the unemployed lumbermen and mill workers who are faced with destitution during the coming winter.

SETTLEMENT OF DISPUTES UNDER A WORLD COURT

New York. — Dispatches from Geneva to the New York Times report that the British Labor Government is envisaging announcement at the League of Nations assembly session, in September, of its acceptance of the general act for compulsory peaceful settlement of all disputes under the world court.

This step is the outgrowth of signature by all the British dominions of the so-called "optional clause," binding them to accept compulsory jurisdiction of the court. Australia's instrument of ratification to the optional clause, the last of the dominions to do so, was deposited recently.

Rt. Hon. Arthur T. Henderson, foreign secretary, is said already to have opened consultations with the dominions for simultaneous signature of the general act in September, in the same way that they signed the optional clause last year.

Thirty states, or more than half the league's membership, have now signed the optional clause, but only three have bound themselves by the general act. These are Belgium, Denmark and Norway. The French Chamber of Deputies approved it in June, but the senate has not yet acted.

Grow Grain At Churchill

Wheat, Oats and Barley Can Be Successfully Grown At Northern Port

The Pas, Man.—Wheat, oats and barley will be successfully grown at Churchill within four or five years. That was the prediction made here recently by D. A. Brown, of the Federal Government Experimental Farm at Brandon, Man., who has just returned from a trip on the Hudson Bay Railway.

Mr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing. With proper cultivation and good soil, grain will mature well at the seaboard, he believes.

The official inspected the first plot of grains to be grown at the Hudson Bay port. They did not fare very well, partly due to late sowing and lack of good soil, but Mr. Brown states that the experiment was well worth while. Reward and Garnet wheat attained a height of 18 inches, but it isn't expected to ripen because it was sown late. Alaska oats has made a fair showing, while Trebi barley has a good chance of ripening.

However, garden produce, such as radishes and lettuce, were raised successfully at Churchill this season. Potatoes did not fare well.

W. Wood, of the railway construction department of the C.N.R., was responsible for the grain-growing experiment at the Hudson Bay port.

Grains have matured well at several points along the Bay Railway this year, Mr. Brown reports.

Bandit Robs Calgary Bank

Forces Bank Teller To Hand Over Large Sum and Then Disappears

Calgary, Alberta.—Unmasked and alone a bandit walked into the Elbow Park branch of the Bank of Montreal at 12:15 noon, and at the point of a nickel-plated revolver forced the bank teller to hand over a roll of bills amounting to approximately \$7,500, then backed out of the door and disappeared.

H. H. W. Beyerstein, the teller, was alone in the bank at the time, the manager, N. T. Woodward being out for lunch. He telephoned the city police immediately and described the bandit as similar in appearance, actions and dress to the unknown man who shot Ernest Midwinter, taxi-driver, to death on the Okotoks road.

Elevator Destroyed By Fire

Winnipeg, Man.—Damage estimated at \$75,000 resulted when fire razed the Assiniboine Grain Company elevator in St. Boniface, across the Red River from Winnipeg. The structure was valued at about \$60,000 and it contained 50,000 bushels of barley, property of Wiley, Low and Company, grain merchants. Insurance covers the damage, it is stated.

THE KING'S DOCTOR

Lord Dawson, of Penn, physician to His Majesty King George V. as sketched by Miss Kathleen Shackleton, on board the Canadian Pacific liner "Empress of Australia." Lord Dawson is reputed to have the finest doctor's hands in England, and has the fine features and eyes sometimes recognizable in great artists.

He is looking forward to his first sight of the Rockies and later is going to disappear and take a real holiday out West. A ranch is his ultimate destination.

TOWN & COUNTY

Personalographs

Monday, September 1st, is Labor Day and a Dominion holiday. All places of business will be closed.

Miss Daphne Nash returned Friday after spending a few days in Calgary.

Miss Annie MacDonald returned on Friday last from the Drumheller hospital, where she recently underwent an operation for appendicitis.

Neil Cunningham was a Calgary visitor the first of the week.

Yesterday was the last of the Wednesday half holidays for this year. In future all stores will be open all day on Wednesday.

FOR SALE—75 head of Oxford Grade Breeding Ewes, in lots to suit purchaser. —Alex Reid, Carbon, Alta.

A couple of members of the Alberta Provincial Police force were in town on Saturday. We understand that they were looking for stills in the vicinity of Carbon and that the local mine was visited in this connection.

Mrs. G. L. McFarlane was a Calgary visitor last week and returned on Saturday.

Mr. and Mrs. Green and son of Calgary spent the week end at the home of Mr. and Mrs. H. N. Elliott.

A good rain fell in the district on Monday night and as a result threshing operations have been suspended for a few days.

The Mortimer family motored into Calgary on Sunday to see their father, who is ill in the Holy Cross Hospital.

Born to Mr. and Mrs. H. Davis on Tuesday, August 26, a son.

Miss Kate Ramsay returned Wednesday night after spending the summer holidays in Calgary.

Miss Elizabeth Colvin of Drumheller arrived Friday and is visiting with friends in Carbon.

Mr. and Mrs. L. Poxon and Francis left Sunday on a motor trip to Red Deer, Edmonton and other points.

Joe Silver left for his home in Calgary on Wednesday after spending a month with his uncle, I. Guttman.

EXPORTS CATTLE TO BRITAIN

Renewal of efforts to establish an export trade for Canadian cattle to Britain is soon in the shipment of 64 head of store cattle which left the Montreal Stockyards of the Canadian National Railways last Thursday on their way to England. This is the first shipment of its kind in three years.

"The importance of the effort to establish a trade with Britain lies in the fact that, with prices generally low in Canada at present, and with little possibility of further trade with the United States due to the tariff, there is a surplus of cattle for market, and any export trade which could be developed would relieve the situation in the Dominion to a considerable extent, and would be a large factor in at least stabilizing the market at its present level, and prevent its going much lower, which would be rather disastrous for the Canadian cattlemen," a prominent cattleman said.

Prof.—Do you know how to find the horsepower of a car?

Student—No!

Prof.—Easy; just lift the hood and count the plugs.

Never shift your mouth into high gear unless you are sure your brain is turning over.

Trust Mother Nature

"My husband is particularly liable to sea-sickness, captain," said she.

The skipper nodded; "I've heard of the complaint before, ma'am."

"Could you tell him what to do in case of an attack?" asked the woman.

"Tain't necessary, ma'am" replied the skipper. "He'll do it."

AUGUST 29 & 30

RUTH CHATTERTON

— IN —

Charming Sinners

It takes a smart woman to outplay a man at his own game—and that man her husband. You'll meet a clever wife in this brilliant W. Somerset Maugham comedy-drama! And you'll laugh at the smart trick that gives her what she wants! A sparkling cast in an intimate entertainment.
